

Green Wrap®

Recycled Digital Printing & Copying Paper

The development of Green Wrap is part of Fuji Xerox's overall commitment to the environment and our long-term strategy of developing high performance waste - free products within waste free offices.

The pulp used to manufacture Green Wrap is made from 60 % recycled Post Consumer Waste fibre (produced from Australian waste) and 40 % sustainable new fibre that is made with "The Programme for the Endorsement of Forest Certification (PEFC) certified pulp. PEFC works throughout the entire forest supply chain to promote good practice in the forest and to ensure that timber and non-timber forest products are produced with respect for the highest ecological, social and ethical standards. Thanks to its eco-label, customers and consumers are able to identify products from sustainably managed forests.

It is clean and white with a smooth surface, so it's suitable for single and double-sided photocopying and printing. As well as its copying uses, it is ideal for low to high volume laser printers, digital printers, multifunction devices and plain paper faxes. What makes it such an exceptional recycled copy paper is its pre and post imaging flatness, improved fine line definition and extended range of sizes and weights, which allows for a larger number of office applications. Green Wrap is an acid free sheet with archival rating of several hundred years. This archival rating conforms to the International Archival Specification ISO 9706.

Made in Australia and exclusive to Fuji Xerox

Green Wrap has been exclusively developed by Fuji Xerox Australia to precise specifications and made in Australia by Australian Paper Mills, 80gsm being made at their Maryvale Mill in Victoria and 150 and 200gsm at their Shoalhaven Mill in NSW, all produced from Australian waste.

Product Pulp Composition

The pulp used in 80gsm Green Wrap contains post consumer waste and woodfree pulp as follows:

60 % Australian recycled waste, classified post consumer by AS/ISO14021 guidelines, Process Chlorine Free (PCF)

40 % new fibres Elemental Chlorine Free processes (ECF) from a mixture of local and imported sustainably managed, ISO14001 certified and PEFC certified plantation fibre.

- 20 % Australian fibre.
- 20 % New Zealand fibre.

Chemical substances

None of the following chemicals are used in the production of Green Wrap

Asbestos

Benzene

Ozone Depleting Substances (ODS's)

Polybrominated biphenyl (PBB)

Polybrominated diphenyl ether (PBDE) or polybrominated diphenyl oxide (PBDO)

Polychlorinated terphenyl (PCT)

Polychlorinated biphenyl (PCB)

Polychlorinated naphthalene (only those containing 3 or more elemental chlorine in the molecule)

1,1,2 – Trichloroethane

Fact Sheet

Product Specification

Green Wrap is made from a mixture of new fibre that is Elemental Chlorine Free pulp (ECF) that complies with ISO14001 and PEFC environmental accreditations and recycled fibre that is post consumer waste and is Process Chlorine Free (PCF). Green Wrap is an acid free sheet. Moisture levels and curl are computer controlled to Xerox International Specifications.

Packaging

Green Wrap's carton and lid contain over 80 % recycled fibre.

GSM:	80	150	200
Moisture content:	4.2%	5.3%	5.3%
Opacity:	92%		
CIE Whiteness:	140	140	140

100% Quality Guarantee

Green Wrap is 100 % guaranteed in all Xerox Photocopiers and Laser Printers. This means that if you are not 100 % satisfied, we will exchange it for you.
